

MARCOS ALVAREZ, MBA

(562) 659 7554 | Riverside, CA | marcos@vetfleet.com | [Marcos H. Alvarez @ LinkedIn](#) | [VetFleet.Com](#)

PROFESSIONAL SUMMARY

Results-driven business development consultant with an MBA and extensive experience in alternative fuel technologies, including hydrogen and battery-electric systems. Achieved a 30% reduction in project delays and a 42% decrease in customer complaints. Proven track record in fleet electrification, regulatory compliance, and technician training, driving innovation in clean transportation.

KEY SKILLS

Business Development | Alternative Fuel Technologies | Fleet Maintenance Strategy | Zero-Emission Vehicles | Hydrogen Fuel Systems | Battery-Electric Trucks | Renewable Natural Gas & Diesel Systems | Advanced Ultra-Efficient Diesels | Hybrid Powertrains | Regulatory Compliance | Emissions Standards | Technical Consulting | Clean Transportation | Fleet Electrification | Vehicle Diagnostics | Performance Testing | Preventive Maintenance | Technician Training | Powertrain Integration | Data Acquisition Systems | Sustainable Fleet Operations | Transportation Innovation | Research & Development | OEM Collaboration | Freight Efficiency | Mobility Solutions | Technical Writing

PROFESSIONAL EXPERIENCE

NORTH AMERICAN COUNCIL FOR FREIGHT EFFICIENCY (NACFE) Remote

Heavy-Duty Truck Powertrain Alternatives Maintenance Researcher Jan '25 - Present

- Executed comprehensive data analysis of cross-industry maintenance complexities and operational challenges for battery-electric, hydrogen fuel cell, renewable natural gas, and ultra-efficient diesel trucks, utilizing advanced maintenance software tools to enhance informed adoption of alternative powertrains
- Crafted comprehensive 150-page reports analyzing maintenance best practices, regulatory requirements, and technical challenges, influencing policy decisions and advancing industry practices in alternative fuel truck technologies
- Leveraged predictive maintenance and data analysis tools to enhance fleet operations, significantly improving sustainability metrics and operational efficiency
- Extracted field insights on maintenance trends in the clean transportation sector, enhancing industry knowledge and identifying key trends through expert interview techniques

VETERAN FLEET TECHNOLOGIES, LLC Riverside, CA

Owner | Consultant Jan '24 - Present

- Evaluates and integrated hydrogen, battery-electric, renewable natural gas, and ultra-efficient diesel truck powertrains for national fleet deployment, achieving a 10% increase in client cost savings through effective consultation on clean transportation technologies
- Executes hands-on field testing and comprehensive performance assessments of alternative fuel truck prototypes using telematics systems and emission measurement devices, driving data-driven validation efforts that enhanced fuel efficiency and optimized truck performance
- Advises on regulatory compliance for emissions standards while utilizing renewable natural gas and advanced ultra-efficient diesel technologies, recommending cost-saving preventive maintenance protocols that enhanced platform efficiency
- Refines technician training programs on diagnostics and troubleshooting for electric drivetrains and hydrogen fuel systems, achieving a 10% reduction in energy consumption and enhanced vehicle performance

UNIVERSITY OF CALIFORNIA, RIVERSIDE, CE-CERT Riverside, CA

R&D Engineer II Jan '22 - Present

- Championed lab development for UC Riverside's Phase II OSAR program, utilizing Python, MATLAB, and LabVIEW to enhance sensor data accuracy by 40% across a fleet of over 100 vehicles
- Achieves a 25% reduction in project delays for UC Riverside by utilizing Excel and Google Sheets to optimize milestone tracking and enhance collaboration with environmental monitoring partners
- Conducts the installation and assessment of Onboard Sensing and Reporting systems across a diverse fleet using custom telematics platforms and in-vehicle sensors, resulting in a 30% enhancement in emissions analysis accuracy
- Utilizes advanced emission monitoring software and data analysis tools, including MATLAB, Python, and R, to identify critical pollution plumes and develop fuel efficiency optimization strategies, enhancing environmental sustainability and improving fuel efficiency by 10%
- Enhances engineering onboarding by recruiting veterans from UC Riverside and partnering with Bourns College to develop structured training materials, significantly improving comprehension of data acquisition systems and Internet of Things sensors

- Fosters an inclusive talent pipeline through targeted recruitment efforts at UC Riverside's Veterans Center and mentorship initiatives at Bourns College, leading to improved skills and increased workforce diversity among early-career researchers focused on laboratory instrumentation and emissions testing

HYBRID VETERAN VEHICLE SERVICES

Downey, CA
Jan '19 - Jan '21

- Owner

 - Transformed business model at Hybrid, specializing in high-margin engine and electrical diagnostics to drive a 20% revenue increase through value-based upselling strategies that established customer trust
 - Orchestrated comprehensive diagnostic and repair services for electric, hybrid, and alternative fuel vehicles, achieving a 10% reduction in maintenance costs while implementing recycling initiatives and energy-efficient practices to elevate customer satisfaction
 - Revamped service reporting and enhanced client transparency by deploying Snap-on and Autel tools for tablet-based digital inspections, cutting customer interaction time by 30 minutes and strengthening client retention rates
 - Delivered certification-aligned technical workshops that upskilled technicians in clean vehicle systems, resulting in a 15% boost in operational efficiency

TESLA / MR. STEAM / STEWART’S / USC HOTEL

Los Angeles, CA
Jan '16 - Jan '19

- Mobile & Shop Service Technician | Facilities Engineer | Mechanic

 - Delivered Tesla Model S/3/X/Y mobile and shop diagnostics, swapping NVIDIA-based AI gateway chips, reprogramming firmware, and exercising FSD test plans while following OEM high-voltage isolation protocols a every code/telemetry outcome for engineering
 - Facilitated the efficient replacement of high-voltage battery modules, Telsa ToolBox Software to track critical tool calibration, significantly decreasing vehicle downtime and enhancing customer satisfaction
 - Enhanced international hospitality client experiences by implementing high-voltage wiring installations and custom distribution panels for streaming-suite and audio-visual systems, lighting and audio power, Low-Voltage systems
 - Managed a \$1 million inventory for Mr. Steam luxury boiler and generator service, ensuring high-touch Japanese and Beverly Hills clientele received timely updates throughout the diagnostics and service completion process
 - Built Stewart’s Custom Automotive client trust through concierge-level restoration (including a five-pedal Plymouth and \$500 K Corvette), combining precision engineering with storytelling updates before launching my own business.

EDUCATION

UNIVERSITY OF CALIFORNIA, RIVERSIDE

Riverside, CA
Master of Business Administration (MBA) in General Management
June 2026

RIO HONDO VALLEY COLLEGE

Whittier, CA
Associate of Science (AS) in EV & Hydrogen Fuel Technology
October 2022, Dean' list

UNIVERSITY OF CALIFORNIA, BERKELEY

Berkeley, CA
Bachelor of Arts (BA) in English Literature & Language
October 2018

PASADENA CITY COLLEGE

Pasadena, CA
Associate of Arts (AA) in Humanities
June 2011, Deans List | Oxford Study Abroad, English Program - Spring 2011

CERTIFICATIONS

- HDIM Tester Referee — California Air Resources Board (CARB)
- 2021 VNR High Voltage & Safety — Volvo
- OSHA 10 & OSHA 30 Certified
- EPA 608/609 MVAC Universal Refrigerant Certification (2000, 2022)
- ASE Certifications: A Series (Engine Performance, Electrical, HVAC, Suspension, Transmission)
